

Environmental Policy

Basic Principles

NIPPON Group is committed to contributing to the realization of a sustainable society by aiming for harmony between people and the environment, while being deeply aware of the fact that its business activities have an impact on the environment.

Guidelines for Action

1. Under this Environmental Policy, we will set environmental targets, and all employees will make a sincere commitment to environmental preservation.
2. We continuously improve our environmental management system to enhance our environmental performance.
3. We will comply with environmental laws and regulations, international declarations, codes, conventions, treaties, and our own self-directed management standards applicable in the countries and regions where we conduct business. We will also cooperate with environmental policies of government and industry organizations.
4. We will promote the reduction of greenhouse gas emissions and the efficient and sustainable use of energy. In addition, we will strive to develop and provide products and services that contribute to climate change mitigation, thereby contributing to the realization of a decarbonized society.
5. We will contribute to the formation of a resource-circulating society through the effective use of resources, waste reduction, and the promotion of recycling.
6. We will appropriately manage chemical substances and strive to prevent environmental pollution and mitigate its impact, reduce emissions of air pollutants, and reduce and properly treat hazardous waste and wastewater.
7. As a company that depends on water and land, we recognize the importance of biodiversity and the benefits provided by ecosystem services. We will minimize our impact on biodiversity and strive to preserve it.
8. We will provide employees with education and awareness-raising activities to help them

understand the impact of our business activities on the environment, and promote actions based on this Policy.

9. By actively supporting the environmental activities of local communities, we will prevent local pollution as well as contribute to the health and safety of all stakeholders.
10. We will disclose appropriate information concerning our environmental preservation activities, actively communicate with stakeholders, work with relevant parties to resolve environmental issues, and pursue continuous improvement.
