NIPPN Group's First Overseas Frozen Food Plant

Completion of Frozen Dough Manufacturing Plant at NIPPN (Thailand) Co., Ltd.

NIPPN (Thailand) Co., Ltd. (President: Koji Saito), a NIPPN Group company, announces that it has completed the construction of the new Frozen Dough Manufacturing Plant, located adjacent to the company's premix plant.

Since it was established in 2006, NIPPN (Thailand) Co., Ltd. has provided a stable supply of premix products, meeting the needs of the times, and has been continuously growing in the ever-changing business environment due to diversified food consumption. Along with Nippon Flour Mills (Thailand) Ltd., a distributor established in 1996, the company has been proactively engaged in activities in Thailand and surrounding countries to expand the business.

The marketability of frozen dough in addition to premix products can be determined based on past business performance, which led to the construction of this new plant.

The NIPPN Group has a pasta plant in the United States and premix plants in China and Thailand. This new plant will be the NIPPN Group's first overseas frozen food plant.

The NIPPN Group has been proactively making investments in equipment in areas with potential for growth in Japan and overseas. The Fukuoka Premix Plant and Frozen Food Plant 2 at NIPPN Frozen Food Co., Ltd. in Isesaki City were completed in October and November 2020, respectively. In addition, a new premix plant is under construction in Indonesia. The NIPPN Group will continue strengthening and expanding its food business and overseas business while responding to the changing business environment.
