Introduction of photovoltaic power generation facilities
in NIPPN (Thailand) Co., Ltd.
for the realization of a low carbon society
projected annual reduction of 600t CO₂

NIPPN (Thailand) Co., Ltd. (President: Toshiharu Matsuo), a NIPPN Group company, announces that it has introduced photovoltaic power generation facilities in premix plant and frozen dough plant to promote the use of renewable energy.

Based on the Management Philosophy “Contributing to the realization of a sustainable society by pursuing the well-being (happiness, health, and smiles) of people.”, the NIPPN Group has been working to protect the environment by establishing environmental management systems, reducing waste, introducing energy-saving facilities.

This is the first time that the Group has introduced photovoltaic power generation facilities at one of its overseas locations. The annual power generation capacity of the facilities is estimated to be about 1,000 MWh, which is expected to reduce CO₂ emissions by about 600 tons per year.

The Group will continue to be aware that its business activities are benefiting from the bounty of nature and will continue to take measures to respond climate change.

**【Overview of the photovoltaic power generation facilities
in NIPPN (Thailand) Co., Ltd.】**

Power generation capacity	760kw
Annual power generation (forecast)	About 1,000 MWh/year
CO₂ reduction (forecast)	About 600 tons/year

NIPPN (Thailand) Co., Ltd. with photovoltaic power generation facilities.
